

WA451 PASSIVE REVIEW RUN REASON WILL NOT END COVERAGE

When processing a Passive Review Response, the Passive Review run reason is used when running EDBC for the first available unpaid month. This run reason works appropriately as long as the consumer will remain eligible for benefits. However, if the consumer is no longer financially eligible for benefits, continuous eligibility will hold in error and not allow them to be discontinued.

These steps assume the worker is on the **EDBC Summary** page and a result of Continuing Eligibility is shown for an Active Member who should now be discontinued.

Complete the following:

- STEP 1** Click the **Cancel** button on the **EDBC Summary** page to back out of the EDBC without saving.
- STEP 2** Re-run the EDBC using the **CE Reset Run Reason**. This allows any members who are no longer eligible to be discontinued.
- STEP 3** Review the **EDBC Summary** page for accuracy. If everything is correct, then **Accept and Save** the EDBC results.
- STEP 4** If any person(s) on the program remain Active, navigate to the **Medical Person Detail** page and shorten their CE Period back to what it was originally.
