WA395 MEDICARE EXPENSE DETAIL RECORD REQUIRED FIELDS

When a **Medicare Expense Detail** record is created additional fields are being required to leave the page.

Name, **Medicare Claim Number** and **Begin Date** are the only fields that show required when the worker first comes to the page. Once these fields are updated with the correct information and the worker clicks **Save and Return** an error will be displayed requesting a **Payment Method** and **Payment Amount**.

> **NOTE:** The values in this workaround should only be used if there are no other valid values based on the consumer's current situation.

STEP 1:   In the **Part A Payment Method:** drop-down select **Free.**
STEP 2:   **Part A Payment Amount** field enter **$0.00.**
